

Comparison Guide: Intelichart's Patient Intake vs. The Others

According to a recent survey of 1,000 patients conducted by Intelichart, 68% of patients prefer to fill out intake forms online.

Although many health IT vendors claim their technology can digitize and streamline the entire intake process, there are often hidden limitations caused by outdated integration methods, technology that doesn't work well together, or a lack of self-service customization options.

Fortunately, Intelichart's Patient Intake offers exactly what it promises – a truly customizable intake experience that can eliminate the use of paper forms for good.

Let's explore what your patients and staff can expect with the Intelichart's Patient Intake versus other patient engagement vendors.

68 percent

of patients prefer to fill out intake forms online

Intelichart vs The Others: Intake Steps

1 Form generation

Intelichart: Create fully customized forms to fit within your unique workflows.

Other solutions: Select from a library of forms which may or may not relate to your specialty.

2 Form selection

Intelichart: Both demographic and clinical forms can be used, with no limitations on information type.

Others: Digital forms may not be available for some information.

Say good-bye to paper forms for good

With Intelichart's Patient Intake, you have complete flexibility to digitize your entire intake process – there are no limitations on the forms you can build or the data you can capture. This reduces data inaccuracies and eliminates the need for manual input by staff.

3 Pre-visit form distribution

Intelichart: Form packets are sent automatically according to appointment type.

Others: Forms are chosen manually and sent individually.

4 Completing forms

Intelichart: Information from the patient record is used for auto-fills; OCR technology helps to increase accuracy.

Others: No autofill capabilities; each field needs to be filled in, every time.

5 Finishing incomplete forms

Intelichart: Patient inputted information is saved to incomplete forms, staff input missing information.

Others: Staff start the form again and complete all fields.

Create efficiencies for patients and staff

Patients appreciate the efficiency of completing forms without redundant data entry, enhancing satisfaction and encouraging form completion prior to visits. Office staff save time on intake management, enabling them to prioritize quality care delivery.

6 Tracking complete forms

Intelichart: Track completed forms at-a-glance via a dashboard.

Others: Manually track which forms have been completed.

7 Inputting data from forms into the EHR

Intelichart: Form information flows into the EHR as discreet data according to your criteria – automatically or upon approval.

Others: Data needs to be manually entered or uploaded.

8 Form changes

Intelichart: Easily revise, add, or delete forms in the platform.

Others: Create a ticket and wait weeks for your VAR or EHR to create or revise your requested forms.

Intelichart vs The Others: Additional Capabilities

In addition to enhancing the specific steps of the intake process, Intelichart's Patient Intake is also equipped with additional capabilities to foster greater patient engagement and reduce headaches for staff.

Additional capabilities: Integration

Intelichart: API integration enables effortless flow of information between Patient Intake and your EHR, with minimal effort required of staff.

Other solutions: Outdated integration methods such as HL7 interfaces or CCDA transfers cannot support the real-time flow of demographic and clinical data into your EHR.

Additional capabilities: Automated reminders

Intelichart: Forms are automatically sent to patients via their preferred communication method and automated reminders are sent if forms are not completed.

Other solutions: Forms must be sent manually by staff and aren't delivered according to the patient's preference

Additional capabilities: Collecting patient payments

Intelichart: Easily accept patient copays or outstanding balances digitally.

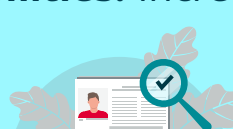

Other solutions: Wait until the patient is in the office to manually collect payment.

Additional capabilities: Increasing portal adoption

Intelichart: Patients receive a prompt to create a portal account after completing intake forms

Other solutions: Patients wait until after their visit to create an account, causing more work for staff when they call in for test results and follow-up questions.

Get paid faster

Streamline patient interactions and expedite payments by utilizing our patient payment capabilities in conjunction with Patient Intake. Our flexible integration capabilities can work with any payment processing vendor so you can keep your existing partnerships and infrastructure intact.

Intelichart distinguishes itself with its **advanced** approach to data management for patient intake. Customized data flows ensure seamless and accurate integration of information into patient records and allow this process to be tailored to your specific criteria – significantly reducing the workload of healthcare staff.

By partnering with Intelichart, healthcare providers gain a substantial edge in efficiency and patient data management, outpacing the capabilities offered by other vendors in the market.
